

Incubator

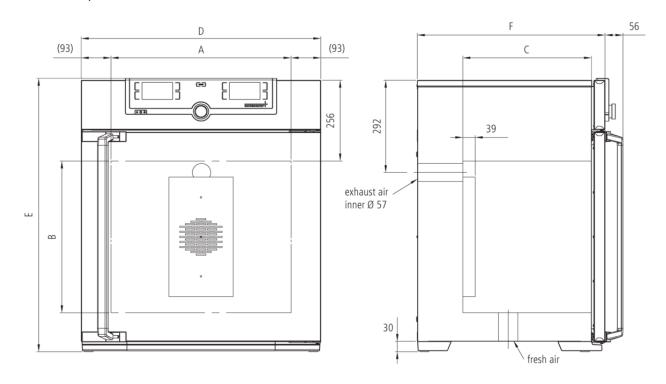

IF30plus

The incubator I is at home everywhere in the world of research, medicine, pharmaceutics and food analytics, as well as food chemistry.

The heating of this incubator is optimally tuned for forced air circulation; the fan can also be switched off completely, and valuable chamber loads for research, pharmaceutics, medicine and food chemistry are warmed up very carefully.

On this page, you can find all the essential technical data on our incubator. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at sales@memmert.com.

Setting temperature range min. 10°C above ambient up to +80°C Setting accuracy temperature Temperature sensor 2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error Control technology Control COCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TET-colour displays. Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fathrenheit), fan speed, air flap position, programme time, time zones, summertime-wintertime Sterillisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture acjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Communication Documentation programme stored in case of power failure Communication Documentation programme stored in case of power failure Safety Temperature control covertemperature monitor TWW, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature monitor "ASF", automatically following the setpoint value at a present tolerance range, aiarm in case of over-or undertemperature, heating is switched off in case of overtemperature. Autodiagnostic system for fault analysis Alarm visual and acoustic	Temperature	
Setting accuracy temperature Temperature sensor 2 P1100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error Time and the process time does not start until the setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature monitor TWA, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undetemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of over-temperature with analysis	Setting temperature range	+20 to +80 °C
Temperature sensor 2 P1100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error Control technology ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays. Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control apaprox. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature world or fault analysis	Working temperature range	min. 10°C above ambient up to +80°C
Control technology ControlCOCKPIT TwinDISPLAY, Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays. Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Communication Documentation programme stored in case of power failure Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TVW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	•	0.1 °C
TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays. Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Temperature sensor	<u> </u>
Language setting German, English, Spanish, French, Polish, Czech, Hungarian Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Control technology	
Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	ControlCOCKPIT	· · · · · · · · · · · · · · · · · · ·
Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature for fault analysis	Language setting	German, English, Spanish, French, Polish, Czech, Hungarian
Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control approx. 20°C above nominal temperature overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Function SetpointWAIT	the process time does not start until the set temperature is reached
Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature.	Calibration	three freely selectable temperature values
Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature	adjustable parameters	
Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature for fault analysis	Sterilisation	
Fresh air admixture adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment individually Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Ventilation	
Vent vent connection with restrictor flap Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature for fault analysis	Fan	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually
Communication Documentation programme stored in case of power failure Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Fresh air admixture	
Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Vent	vent connection with restrictor flap
Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Communication	
Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Documentation	programme stored in case of power failure
approx. 20°C above nominal temperature overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Safety	
AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Temperature control	
value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature Autodiagnostic system for fault analysis	Temperature control	•
	AutoSAFETY	value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off
Alarm visual and acoustic	Autodiagnostic system	for fault analysis
	Alarm	visual and acquetic

Standard equipment

Door	inner glass door
Works calibration certificate	incl. works calibration certificate for +37°C
Internals	1 stainless steel grid(s), electropolished
Door	fully insulated stainless steel door with 2-point locking (compression door lock)

Stainless steel interior

Dimensions	$w_{(A)} \times h_{(B)} \times d_{(C)}$: 400 x 320 x 250 mm (d less 39 mm for fan)
Interior	easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
Volume	32 l
Max. number of internals	3
Max. loading of chamber	60 kg
Max. loading per internal	20 kg

Textured stainless steel casing

Dimensions	w _(D) x h _(E) x d _(F) : 585 x 704 x 434 mm (d +56mm door handle)
Housing	rear zinc-plated steel

Electrical data

Voltage	230 V, 50/60 Hz
Electrical load	approx. 1600 W
Voltage	115 V, 50/60 Hz
Electrical load	approx. 800 W

Ambient conditions

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 660 x 890 x 650 mm
Net weight	approx. 48 kg
Gross weight carton	approx. 64 kg

Standard units are safety-approved and bear the test marks
